<b>Interest Rate:</b>	The applicable nominal interest rate will be: (i) fixed at 17.50% during the first 4 semester payment of interest and (ii) variable within the last 6 semester interest payments.

The variable interest rate that remunerates each bond will result from adding a percentage margin to an indexer, rounded up to 1/20 of a percentage point equal to or immediately above.

The variable interest rate that pays each bond in the last 6 semiannual payments will be determined until 8:30 am on the second business day prior to the start date of the new interest counting period.

The indexing of the rate that remunerates each bond is determined by the maturity-weighted average rate and the amounts of the last six issues of Treasury Bills, with maturities of more than 63 days.

If these securities are not issued for the periods considered, in the last 28 calendar days at the date of calculation of the indexer, another title that, by its nature, will replace the securities in question will be considered as an index.

The percentage margin to be added to the index is 1.00% (one percent) for the last 6 semester payments of interests.

**Interest Calculation:** The interest will be calculated daily and on a 360-day basis, corresponding to twelve months of 30 days each (i.e. the European model 30/360).

**Redemption Date:** At the end of the issue date December 29, 2027, on the interest payment date of the last coupon, if this date is not a business day (defined as a day on which the Banks are open and operating in Maputo), the redemption date will be adjusted to the business day immediately after.
